

Letter of Intent

SWOG/Hope Foundation Impact Award

Please compile LOI materials as outlined below into a single PDF and submit to morgan@thehopefoundation.org by the date specified on the program page found here: <http://www.tinyurl.com/SWOG-impact>

The Impact Executive Committee will select the projects for which a full application is requested. Projects will be prioritized based on (1) scientific merit; and (2) clinical relevance and potential to integrate with clinical trials. Priority will be given to projects that address issues germane to ongoing or planned SWOG clinical trials, or to projects that show potential for leading to a future clinical trial.

The LOI should be no more than two pages, follow the format specifications below, and include:

- Name, institution and email of SWOG clinical investigator(s)
- Clearly stated hypothesis to be tested (one sentence)
- Description of the overall goals and approach of the progress, including specific aims (one paragraph)
- Description of the clinical need or applications project will address (one paragraph)
- Estimate of the time required to initiate the project (e.g. to obtain regulatory approvals or to get models up and running)
- Rough estimate of budget (up to \$250,000; 1 or 2 years)

In addition:

- Provide biosketch for PI/co-PIs (NIH format, up to five pages each; include other support)
